

Government Digital Strategy

United Kingdom

E-Government

Definitions of Data:

N/A

Main Focus of Document:

Sets out how government will redesign its digital services so that people prefer to use them.

Target Beneficiaries or Sectors:

businesses, citizens

Key Elements:

The strategy sets out how the government will become digital by default.

The central elements of the strategy are for the government to:

- Improve departmental digital leadership
- Develop digital capability throughout the civil service
- Redesign transactional services to meet a new Digital by Default Service Standard
- Complete the transition to GOV.UK
- Increase the number of people who use digital services
- Provide consistent services for people who have rarely or never been online
- Broaden the range of those tendering to supply digital services including more small and medium sized enterprises
- Build common technology platforms for digital by default services
- Remove unnecessary legislative barriers
- Base service decisions on accurate and timely management information
- Improve the way that the government makes policy and communicates with people
- Collaborate with partners across public, private and voluntary sectors to help more people go online
- Help third party organisations create new services and better information access for their own users by opening up government data and transactions
