

National Strategy for Artificial Intelligence

India

Technology

Definitions of Data:

N/A

Main Focus of Document:

Discusses how India can position itself among leaders globally with respect to Artificial Intelligence

Target Beneficiaries or Sectors:

N/A

Key Elements:

Key to this discussion paper is the recognition that India has various barriers that need to be addressed in order to achieve AI goals. Some of the barriers include lack of expertise in research and application to AI, absence of enabling data systems, low awareness to AI and high resource costs, privacy and security issues including inadequate regulations pertaining to anonymity of data, and lack of an effective collaborative approach to the adoption and application of AI.
